Our Founding Principles

At Arctic Spas®, we craft our models with three main ideas in mind; **connection, convenience, and complete wellbeing**. We invite you to learn more about what you will discover in every seat of your hot tub or All-Weather Pool.

Driven by Connection

Your spa is more than just an environment for relaxation. It's a space where joy overflows. Where relationships are built and strengthened. Where wellness is practiced for both your mind and body.

It's where life is always lived to its fullest. Our spas and All-Weather Pools offer a piece of luxury meant for everyday enjoyment.

Designed with Innovation

We're proud to be relaxation providers, future thinkers, and practice leaders in our creation of decadent spa spaces. Each of our technologically advanced features offers convenience and ease, allowing you to simply unwind. With comfort integrated into every seat, and sustainability at the forefront of our minds, you'll feel amazing discovering your most relaxed self.

For Living Life Now

As each innovative feature successfully intertwines Arctic Spas' classic craftsmanship with our revolutionary and modern thinking, we become one step closer to achieving our goal of pure mental and physical wellness for all. In your spa, you can remain present while elevating your health and relaxation for future benefits.

The Arctic Spas® Difference

You're unique and your spa should be too. From industry-leading sustainability practices to intuitive water care systems, discover what sets Arctic Spas® apart.

Superior Energy Efficiency

Innovative FreeHeat™ technology allows our models to be up to 6.8x more energy efficient than traditional hot tubs, offering lower running costs and money saved.

Automated Saltwater Care

Our exclusive Spa Boy® saltwater care system transforms your weekly water maintenance from 30 minutes to 30 seconds with minimal user intervention.

No Site Set-Up

The Forever Floor® fiberglass pad removes the need for costly and intensive site set-up and maintenance.

Complete Customization

Choose from infinite combinations of rich cabinetry, stunning shell colors, and customizable lighting and sound systems.

Local Sales and Service Experts

With showrooms around the world, you can enjoy the convenience of easy, ongoing access to knowledgeable sales and service professionals, wherever you are.

Industry Leading Warranty

Enjoy the peace of mind that comes with lifetime warranty on your Custom Series' shell and floor.

Our Commitment to a **Greener, Cleaner** Planet

The brand that has pioneered sustainability in spas, continues to redefine it. At Arctic Spas®, we have innovated and tooled every part of our process to reduce our impact on the planet, allowing you to unwind with a clean conscience.

At 6.8x more energy efficient than other spas while costing less to run than your daily cup of coffee, it's time to feel amazing about your hot tubbing practice.

Why Hot Water Therapy is for You

Unwind Into Deeper Sleep

Drift into a more peaceful and calm sleep state with the help of your spa. Mimicking your body's natural and fluctuating rhythm, your hot tub raises your core temperature while you soak and allows it to lower upon exiting your spa. This temperature drop signals to your system that it's time for rest and relaxation, preparing you for a deep and rejuvenating sleep.

Get Back to What You Love, Faster

While increasing circulation throughout your body to stimulate blood flow and promote recovery, soaking in hot water also supports improved oxygenation rates to increase muscle recovery. With hot water therapy, you can work hard and recover even harder.

Say Goodbye to Pain

Warm water has just become your new best friend to alleviate joint stiffness and pain. As buoyancy supports your body to decrease stress on your musculoskeletal system, the heat of your spa penetrates into your

muscles allowing for complete relaxation. Combining these features with an invigorating massage system means you will be feeling your best in no time at all.

Become Your Most Relaxed Self

When the stresses of everyday life become seemingly insurmountable, it's time to turn to your very own relaxation haven: your hot tub. Providing an escape from an endless stream of responsibilities, your spa can act as a morale booster and daily injection of positivity.

Strengthen Your Mind and Body

The path to better health starts with your spa. Your hot tub can aid in lowering blood pressure and decreasing stress levels to positively impact your cardiovascular health. While you unwind mentally, take pride in knowing that you are also making a long-lasting, heart healthy choice.

Spa Shown: Totem
Dealer: Polarbad

A large, light-colored hot tub is the central focus, set against a dramatic sunset background. The sun is low on the horizon, casting a warm orange and yellow glow over the scene. In the distance, there are silhouettes of mountains and a body of water. The hot tub's interior is visible, showing a dark, circular drain in the foreground. The overall mood is serene and relaxing.

Classic Series

Featuring Innovation in Every Model

Our mission to provide total mind and body relaxation has been realized in our Classic Series models. Offering the perfect combination of exceptional craftsmanship and intentional innovation, our Classic Series creates an opportunity for wellness that is meant to be seized everyday.

Mustang

● Standard Feature ○ Upgraded Feature

A photograph of a modern outdoor hot tub with a dark grey textured exterior and a white interior. The hot tub is positioned in the foreground, angled towards the right. In the background, there is a tall, rectangular stone fireplace with a fire burning inside. The fireplace is constructed from stacked, irregular stones in shades of grey and brown. To the left of the fireplace, there are several green conical evergreen trees. The background also shows a wooden fence and some greenery under a clear sky.

Core Series

Your Gateway to Relaxation

Welcome comfort into your life with the Core Series lineup. Featuring rejuvenation and relaxation at the forefront of these builds, you'll feel amazing accessing luxury at an exceptional price.

Spa Shown: Orion

Orion

Seats: 6 | Capacity: 8

*Smart pH requires Spa Boy® upgrade

● Standard Feature ○ Upgraded Feature

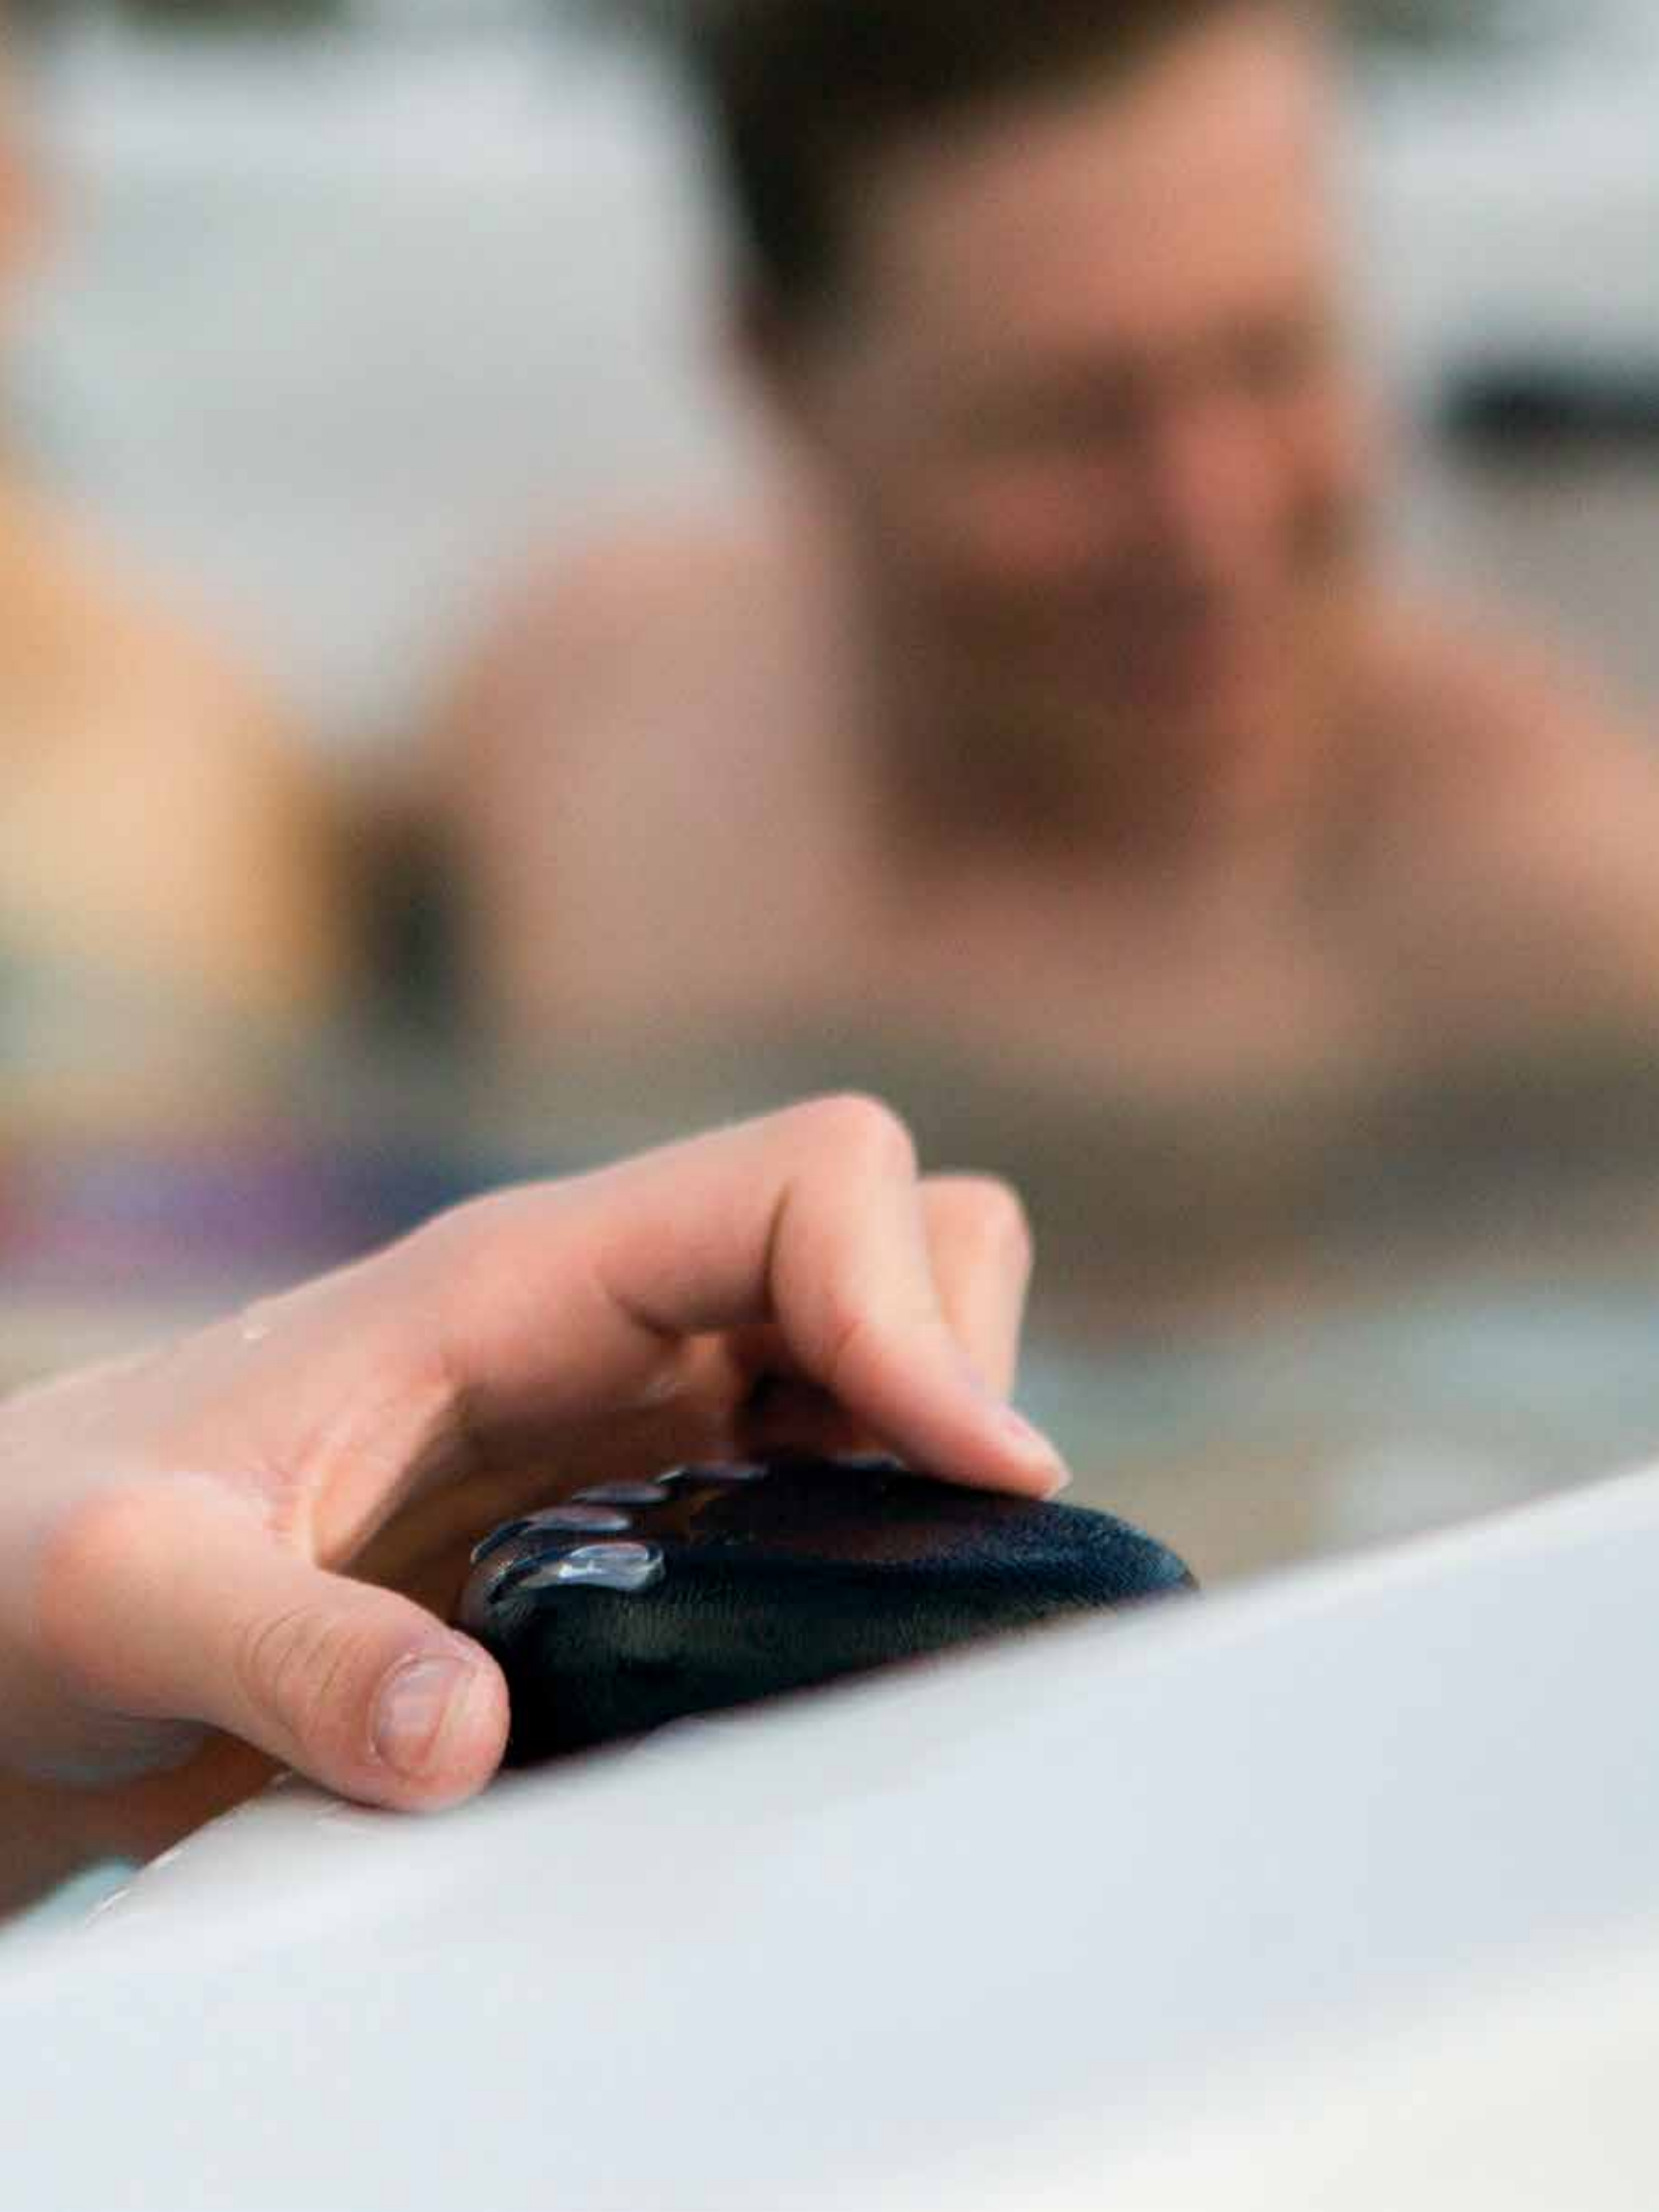

A person with long brown hair is seen from the back, sitting in a hot tub. The background shows a blurred view of the ocean with white-capped waves. The overall tone is relaxing and luxurious.

Features

Classic Craftsmanship Meets Modern Thinking

Arctic Spas® crafts revolutionary features to perfectly showcase our enthusiastic and imaginative engineering style.

Each of our model's elements have gone through rigorous design, testing, and production procedures to ensure they meet our high standards for technological flair and intuitive innovation, while still keeping convenience and usability at the forefront of our features. From automated water care to inspired, ergonomic seating, you can trust in knowing we have truly created top-of-the-line features for top-of-the-line models.

SPA BOY®

LOW OK HIGH
CL ☐ ☐ ☐
pH ☐ ☐ ☐

Arctic Spas' exclusive, automated saltwater care system

The Ease of Automated Water Care

Standard manual water testing can be imprecise, inconvenient, and time consuming. Spa Boy® removes the guesswork from balancing by utilizing medical-grade sensors to continuously analyze your water sanitization levels, even during periods of low use.

Using the data gathered from around-the-clock testing, Spa Boy® helps to automatically adjust salt sanitization levels to maintain your perfect water conditions simply, accurately, and effortlessly – all with little user intervention.

Goodbye Unbalanced Chemicals and Irritation

Traditional hot tubs rely on a wide range of chemical sanitizing products which, when unbalanced, can cause irritation to your skin and damage to your spa. Spa Boy® removes the need for harsh chemical sanitization by utilizing the natural cleaning capabilities of salt.

With no offensive chemical smell or residue, the Spa Boy® saltwater care system promises clean and fresh hot tub water, every time.

Connect from Anywhere in the World

From beaches to mountain tops, you can access your Spa Boy® system from anywhere in the world with the Arctic Spas® mobile app. Should your water require manual adjustments, Spa Boy® will conveniently alert you through your hot tub's topside control panel, the myarcticspa.com portal, and your mobile app.

At just the touch of a button, an optional "Boost" function helps re-balance your spa to ideal conditions. With multiple ways to monitor and adjust your spa, it's easy to ensure your hot tub is ready for enjoyment, any time.

SmartpH

POWERED BY **SPA BOY®**

Driven by the Power of Spa Boy®

Arctic Spas® is proud to offer the all-new Smart pH system, powered by the innovation of Spa Boy®. This revolutionary system allows you to stop playing catch-up with your hot tub's pH by continually sensing and automatically adjusting water conditions to maintain a neutral spa environment.

Improved Water Clarity and Safeguarded Spa Elements

Using data sourced by Spa Boy's around-the-clock water monitoring system, Smart pH automatically senses and adjusts your spa's pH to improve water clarity while greatly lengthening the use of your hot tub elements.

By maintaining a neutral spa environment, Smart pH protects your hot tub fixtures against corrosion to prolong the lifespan of Spa Boy® probes, headrests, jets, and countless other mechanisms saving you time, money, and maintenance efforts.

Smart pH Won't Forget, Even if You Do!

Spa maintenance can be a difficult and tumultuous task that requires precise and frequent water adjustments. By forgetting to perform even one water maintenance session, you may need to spend hours on spa TLC in an attempt to rebalance and resanitize your hot tub.

By partnering with Spa Boy®, the Smart pH system eliminates this commitment by fully automating your hot tub water-care routine, allowing you to permanently remove this task from your mental to-do list.

Connect to Unwind

The Smart pH system is accessible from anywhere in the world via the Arctic Spas® mobile app. By adding this technology to your Spa Boy® package, you can say goodbye to all manual water adjustments, allowing you to unwind in comfort, clarity, and relaxation.

SDS

Hydrotherapy like no other

Your daily relaxation ritual just got elevated. SDS can be aptly described as a tour de force in hydro-therapeutic practices, providing an array of intensive massage sensations that boost endorphins while also uplifting the body and mind.

The SDS feature transforms six of your primary seat's jets into high-flow, high-powered, mini-masseurs that are supplied by one exclusively dedicated water pump. These upgraded jets not only feature a wider diameter to increase the surface area of their massage, but they also include a longer nozzle to offer greater pressure and tension alleviation. With their unique layout, the SDS jets specifically target commonly tight muscles in your neck, lats, and lumbar spine to leave you feeling utterly rejuvenated after every session.

By saying 'yes' to SDS, you're subscribing to a remedy for muscle tension that will continue to benefit you long after you've left your spa.

- Polar Bear

FreeHeat™

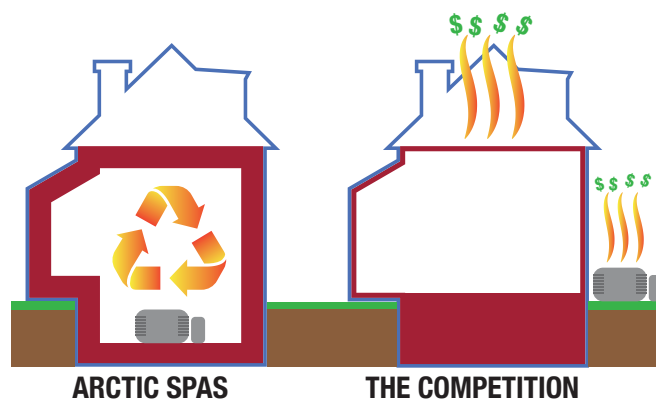

Stronger together

Four of our most innovative features come together to form the FreeHeat™ insulation system. The combination of our composite shell, Mylovac™ Canvasback™ cover, Forever Floor® base, and Total Access™ cabinetry allows for unparalleled energy efficiency, heat preservation, and freeze protection for your spa.

As residual heat from pumps and valves works its way through your hot tub's open cabinet, it penetrates through the shell to warm your spa's water while drastically decreasing energy consumption.

An entirely secure seal created by our revolutionary cover and durable flooring means you can enjoy:

- Lower running costs
- Decreased energy consumption
- Complete protection against even the harshest of weather

Mylovac™ Cover

Keeping heat where it belongs

The Mylovac™ cover is inspired by the unpredictable forces of our natural environment.

When faced with the weight of tumultuous weather conditions, our incredibly durable and long-lasting cover easily offers protection and insulation for your spa's water and internal mechanisms. Choose between vinyl which has a textured, classic aesthetic, built to withstand the elements, or, upgrade to Canvasback™, a lightweight canvas skin that offers a water-resistant finish.

Featuring double-density foam, locking straps, wind flaps, insulated baffles, and an interwoven metal channel that can support up to 2000 pounds, the Canvasback™ cover is unbeatable in design, strength, and functionality.

Self-Supporting Shell

Long-lasting, always warm to the touch

At the core of Arctic Spas' innovative design, you will find an uncompromising and durable Self-Supporting Shell that utilizes artistic craftsmanship to offer premium longevity.

Layer upon layer of filler-free fiberglass is masterfully applied by hand to your shell's acrylic form, offering expertly engineered strength across your entire hot tub. With no vulnerable points created by props or supports, your shell's puncture-proof and independent structure is the highlight of this revolutionary design. Complete with a lifetime warranty*, you can take comfort in knowing that your shell will stand the test of time.

*Lifetime shell warranty is exclusive to the shell's structure, not its surface.

Forever Floor®

Say goodbye to site set-up

Completely remove the need for a complicated and costly spa site set up with Arctic Spas' Forever Floor®. Acting as the perfect combination of durability and innovation, this floor's built-in and impermeable base provides you with hassle-free hot tub installation.

Made from incredibly strong SMC fiberglass, you can trust in knowing your spa has lifetime protection against pests, weather, and moisture.

*A concrete pad is required for all All-Weather Pools with Forever Floor®.

Total Access™ Cabinetry

Unimpeded spa access

Discover ease of entry to your hot tub's internal elements with Arctic Spas' Total Access™ cabinetry. Instead of relying on the destruction of entire spa walls to perform maintenance and repairs, Total Access™ offers removable paneling that creates superior access to all of your hot tub's key mechanisms.

Enjoy easy and seamless upgrades, repairs, and maintenance with the convenience of Total Access™ cabinetry.

OnSpa®

Mobile control, upgrades, and monitoring capabilities

With OnSpa® and the Arctic Spas® mobile app, you can remotely control and monitor your hot tub and its features from anywhere in the world.

This innovative technology allows for two-way communication between you and your spa, giving you total control over:

- Jet settings
- Temperature adjustments
- Pump speed
- Filtration efficiency
- Sanitization
- Ozone levels
- Water pH

Whether you are raising the temperature of your spa to prepare for cold days, or turning on your hot tub's jets to greet yourself with an invigorating massage upon entry, OnSpa® will be there for you.

Preventative care for your spa.

This feature not only offers real-time control of your hot tub but also collects data on energy efficiency, performance, and upgrade requirements. This information collection allows our service technicians to perform technological maintenance on your spa, immediately.

Our dedicated customer care team is consistently monitoring the health of your hot tub parts and software to practice preventative care measures for your spa. By analyzing integral data points from OnSpa®, our experts suggest maintenance requirements and perform software upgrades before you notice the need for them – all in an attempt to provide you with the most relaxing hot tub experience possible.

Peak Ozone

Out-of-this-world sanitization

Explore high-performance sanitization that can only be achieved by the other-worldly powers of Ozone. This system uses particles derived from our earth's atmosphere to safely and effectively break down high amounts of organic carbon, microorganisms, and endotoxins, providing naturally pure and sparkling water for your spa with minimal reliance on harsh chemicals. By utilizing environmentally friendly Ozone particles to amplify the cleanliness of your spa, you can bask in relaxing hot water with no aggressive chemical buildup. Enjoy the peace of mind that comes with making an eco-conscious and sustainable choice for your premium hot tub sanitization.

Onzen™

Escape into the stillness of saltwater

The Onzen™ system utilizes the naturally powerful cleaning capabilities of salt to provide pure and fresh water, without the addition of harsh chemicals. By utilizing salts from the Dead Sea in the process of electrolysis, Onzen™ creates a small amount of natural chlorine to sanitize while natural salts complete the rest of the work.

Onzen™ not only allows you to save money on an otherwise extensive line of chemical products, but it also leaves behind no harsh smell or residue. With the Onzen™ salt water system you can enjoy lustrously smooth water that is gentle on you, your wallet, and the environment.

Cabinets

Premium durability meets rich-toned colors

All of our cabinets are designed to be completely temperature, humidity, and pest-resistant, while still remaining remarkably stylish.

Red Cedar

Crafted from nature's most noble, natural, and strong building material.

Core No-Maintenance

Chic tones combine with premium strength and longevity.

No-Maintenance Cabinet

Enjoy the stylish durability of a composite cabinet, while skipping the sanding and staining.

AllClimate Cabinet™

Featuring the superior strength of SMC fiberglass, this cabinet is built to last and offers incredible protection against harsh weather and wear, year-round.

Acrylic Choices

Realize your spa's aesthetic vision.

Platinum Swirl

Luxurious gray tones perfectly complement a clean, white base

Espresso

Warm-toned browns swirl throughout a coffee-colored base

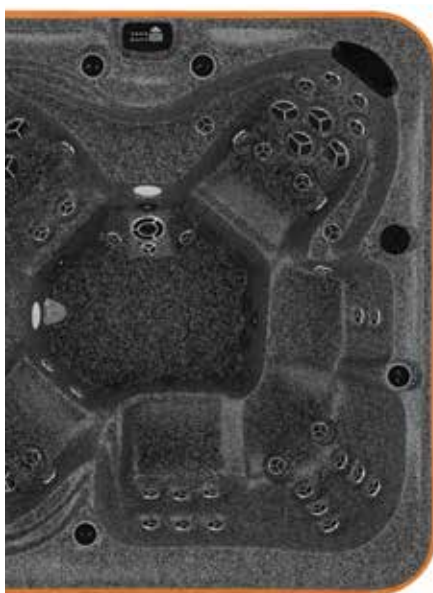

Odyssey

Depth combines with dimension in our darkest shell yet

Polar White

Crisp white, and uncomplicatedly chic

Dakota

This shadowy, textured shell provides low-profile luxury

Kalahari

A cool-toned, textured grey shell offers classic style

Filtration Systems

Crystal clear and luminous water

Progressive Filtration

Arctic Spas' Progressive Filtration utilizes five layers of filter media varying in density and thickness to trap particles ranging from coarse to minuscule.

By appropriately distributing particles throughout all five layers of media, the Progressive Filtration system protects against extensive stress being placed on any one layer. This not only decreases filter turnover but also helps to save your wallet from excessive spending and the environment from excessive waste.

Activeskim Filtration

Activeskim Filtration works to constantly draw surface contaminants down into filter media while simultaneously adapting to fluctuating water levels.

This water level adaptability means Activeskim will never be fully submerged in your spa, allowing it to maintain its powerful filtration while preventing particles and contaminants from being released back into your hot tub.

Jets

Redefining relaxation

Low Profile

Our Low Profile jets have been imagined with sleekness and innovation to provide you with our most non-invasive, relaxing massage yet.

Whereas traditional jet systems often include a bulky design, faulty bearings, and uncomfortable pin-point pressure, Low Profile jets are crafted to be flat-set, rotating, and bearingless to provide an unintrusive, low-maintenance, and relaxing experience in every seat.

Pepperleaf Pulse™

Say hello to your personal masseuse with the Pepperleaf Pulse™ jets. These jets provide you with the perfect pressure and precision, every time.

We have carefully crafted our exclusive Pepperleaf Pulse™ jets to feature convenient technology like screw-out removal, corrosion-proof finishes, adjustable pressure, and bearingless oscillation, allowing them to stand the test of time while offering easy maintenance and replacement capabilities.

Lighting Systems

Sparkling, shining, and shimmering

Enjoy complete mobile control of all your spa's lights with the Arctic Spas® app. With one touch you can choose from a robust offering of effects such as brilliant fades, dynamic patterns, solid hues, or gentle glows.

Northern Lights

Inspired by the dancing colors in the night sky, the Northern Lights package features two submerged light locations that seamlessly unite to flood your spa with rich and decadent colors.

Family Lights

The Family Lights package offers lustrous lighting throughout your spa. With two underwater lights and back-lit spa lipping, controls, and drink holders, this package perfectly completes and complements your hot tub.

Ultimate Lights

Meet the spark behind an iconic spa experience. The Ultimate Lights package provides an incandescent ambiance that radiates from all jets, controls, cup holders, and sconces, allowing them to shine spectacularly.

Corner Accent Lighting

Add an imaginative flair to your spa or All-Weather Pool with the addition of Corner Accent Lighting. This brilliant, color changing LED strip is sure to accentuate your spa's cabinet in the most grandiose way.

Sound Systems

An ecosystem of sound within your spa

WetTunes™

Marine-grade, Poly Planar™ air-rise speakers offer rich and distinctive sound quality while a bass-infused subwoofer provides intensive vibrations to transport you into a world of crisp audio.

Aquatremor®

This innovative sound system turns your shell, seats, and cabinets into “speakers” that allow you to feel the music flowing through you.

Structural transducers drive soundwaves through your spa, creating intense and immersive vibrations that combine with incredibly clear audio. Experience your favorite songs like never before with Aquatremor®.

Headrests

Waterproof longevity meets customizable comfort

Adjustable Headrests

This ergonomic Adjustable Headrest allows for seamless pivoting, comfortable neck cradling, and maximum comfort in any position.

Featuring a telescoping insert, these headrests also allow for easy removability and cleaning while still remaining secure enough to ensure you will never find your cushions submerged or floating away.

Core Series Headrests

Core Series Headrests allow you to enjoy a sleek design that provides pure and uncomplicated comfort. Crafted from EVA rubber, these headrests – like their adjustable counterparts – won’t absorb or collect water and bacteria, creating unparalleled longevity and durability.

Enjoy long-lasting relaxation with the Core Series Headrests.

Arctic Pure®

Premium quality spa care

We are proud to design hot tubs and All-Weather Pools that provide top-of-the-line care for you and your loved ones. We also believe this care should go both ways, which is why we have engineered our own line of additive-free and filler-free chemicals to perfectly care for your spa in the same way it cares for you.

Featuring premier, economical, and easy-to-use water care products, the Arctic Pure® line was made with you and your spa at the forefront of our minds.

Water Features

Soothe your senses, enhance your hot tub

Perfectly complement your spa experience with the addition of a gentle and soothing water feature.

SkyFall® Fogger

Watch as delicate yet dramatic clouds of fog dance and play across your spa's surface. This ethereal feature substitutes the sound and ripples of traditional spa waterfalls with a cascading, airy haze.

Waterfall Experience

Enjoy the tranquility created by a rushing waterfall within your hot tub. The Arctic Spas® signature Waterfall Experience offers the ideal soundscape for relaxation and rejuvenation.

Reflex Torsion™ Hose

Simplifying diagnostic testing

Arctic Spas® utilizes flexible Reflex Torsion™ hoses for leak prevention, easy maintenance capabilities, and incredible protection against bursting pipes.

This highly specialized plumbing is designed to fit externally over rigid surfaces, allowing it to withstand Arctic Spas® high-pressure pumps while also eliminating internal leaks created by hose movement.

Through the incorporation of a flexible outer, Reflex Torsion™ hoses also adapt to changing water volume to prevent plumbing ruptures if the water in your pipes should ever freeze and expand.

From hot water maintenance to flexible hosing, Arctic Spas® is sure to include innovation in every feature.

waterlab

Sanitation Made Simple

Arctic Spas® is committed to making spa maintenance easier and less complicated, inside and outside your spa. With Gecko waterlab, the complexity of spa water chemistry is a thing of the past. The system is a continuous water monitoring and recommendation solution seamlessly integrated into the spa's internal undercarriage. It monitors your spa water's pH and ORP and notifies you on the Gecko mobile app of any adjustments that need to be made with simple suggestions. It was designed to forget it exists so you can enjoy effortless peace of mind and safe, clear spa water.

Titanium Heater

Designed to withstand

Supreme corrosion resistance meets maximum efficiency in our Titanium Heater. Specifically designed to resist the deterioration commonly associated with hot tub use, this heater offers much needed longevity and durability with no mineral buildup.

Complete with fast and efficient warming capabilities, the Arctic Spas® Titanium Heater ensures that you can experience warmth and relaxation on demand, for years to come.

Plug 'N Play

Plug in to unwind

Plug 'N Play by Arctic Spas® removes the need for daunting and expensive electrical set up. Utilizing standard 110V plug-ins, models up to 7 feet with one pump, can effortlessly be plugged-in without specialized electrical preparation.

Not only does this innovative design allow for simple relaxation, it also creates convenient transportation of your spa no matter where you may move. If you have access to a standard plug in, you will also have access to the luxurious comfort and rejuvenation that your spa provides.

With Plug 'N Play, you can spend less time and effort on setup, allowing you to get back to what really matters; relaxation.

Once an Innovator, Always an Innovator

Arctic Spas® is proud to have led the wellness industry through a multitude of hot tub firsts. Our innovative flair and technological advances have defined what true relaxation can look like within your spa.

The earliest days of excellence

Since our inception, Arctic Spas® has strived to employ out-of-the-box thinking in the manufacturing and design processes of our luxurious hot tubs. This idea initially materialized in 1994 through our creation of the first hot tub heat recovery system, complete with a fully supporting and enclosed base. Not only did this invention mark a new standard of freeze protection within all of our spas, it also acted as the basis for the integral FreeHeat™ system that is found in our models today.

By 1997, Arctic Spas® was able to solidify our position as a leader in the hot tub industry by incorporating Reflex Torsion™ hosing in all of our models. This flexible, wide-diameter hosing highlighted our commitment to durability and easy maintenance capabilities for our customers by successfully mitigating leaks and burst pipes at an extraordinary rate.

Building on our pursuit of client convenience, Arctic Spas® designed and implemented our iconic Forever Floor® in 2001 – the first built-in, weather-proof spa foundation on the market. Not only did this feature showcase our desire to push boundaries but it also offered our clients the groundbreaking possibility of saying goodbye to hot tub site set up. This advancement allowed an Arctic Spa to become synonymous with terms

such as 'long lasting', 'money saving', and 'customer convenience'.

Chasing industry firsts

Continuing to push boundaries, Arctic Spas® leapt to new heights in water care with the conception of our Onzen™ system in 2008. This feature functioned as the first proprietary and integrated, salt and ozone water treatment system. Where others may be satisfied with the use of one hot tub sanitization system, Arctic Spas® knew there was a better way to provide cleaner, safer water for you and your spa.

In rapid succession, we expanded our commitment to innovation with the launch of Pepperleaf Pulse™ jets and internet connectivity for your spa in 2010 and 2011, respectively. Our jets employed titanium spinning mechanisms as an industry first, while our Research and Development team was simultaneously crafting the first spa that could be controlled with a smartphone app.

Our innovation in technologically connected spas did not stop with the development of our mobile control but instead functioned as a jumping off point to perfect our systems. Just two years later we announced the development of Web Connect in 2013 as the first internet-connected and controlled hot tub in the

industry. By choosing to not settle with our initial design, we greatly improved the convenience capabilities and ease of use for our customers around the world.

After almost 20 years of technological development, Arctic Spas® refused

to be satisfied with the leaps and bounds of our past. Instead, we complemented our progress with the conception of Spa Boy® in 2017 – the first internet-connected and automated salt-water sanitization control system.

By effectively automating the upkeep of your spa sanitization, Arctic Spas® ushered in a new expectation within the hot tub industry, proving that

*Old version of the app shown

when our client's convenience is top of mind anything is possible.

After 30 years of groundbreaking innovation, we can't wait to see where the future takes us.

Our continued commitment to perfection

Looking ahead, Arctic Spas® is eager to continue leading the way in hot tub innovation through the introduction of Smart pH. Working in conjunction with the iconic Spa Boy® system, Smart pH will entirely automate your spa experience by automatically adjusting your hot tub's water to a neutral pH while Spa Boy® simultaneously maintains your ideal sanitization levels.

Although technology has changed over the years, one thing remains the same; Arctic Spas® is committed to the ongoing development and improvement of our spas and features, all in the pursuit of crafting the most convenient, relaxing hot tub experience possible.

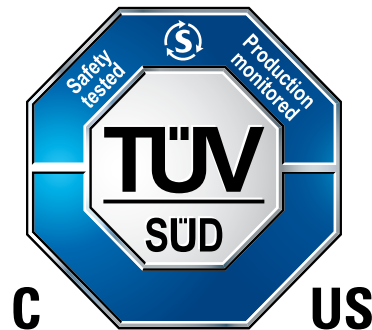

Manufacturing and Certifications

As an international hot tub company, Arctic Spas® is committed to being an industry leader in energy efficiency, safety standards, and responsible manufacturing practices.

Not only are we a good standing HotTubStar member, but we are also TÜV certified, representing our obtainment of approval by one of the most respected manufacturing certification organizations in the world.

Certificate
Z1US 056165 0070 Rev. 04

Certificate
U8 056165 0071 Rev. 04

Arctic Spas® is also proud to be certified by international regulatory agencies such as; UL 1563 (USA), CSA C22.2 #218 (Canada), and IEC 60335-1/IEC 60335-2-60 (Europe).

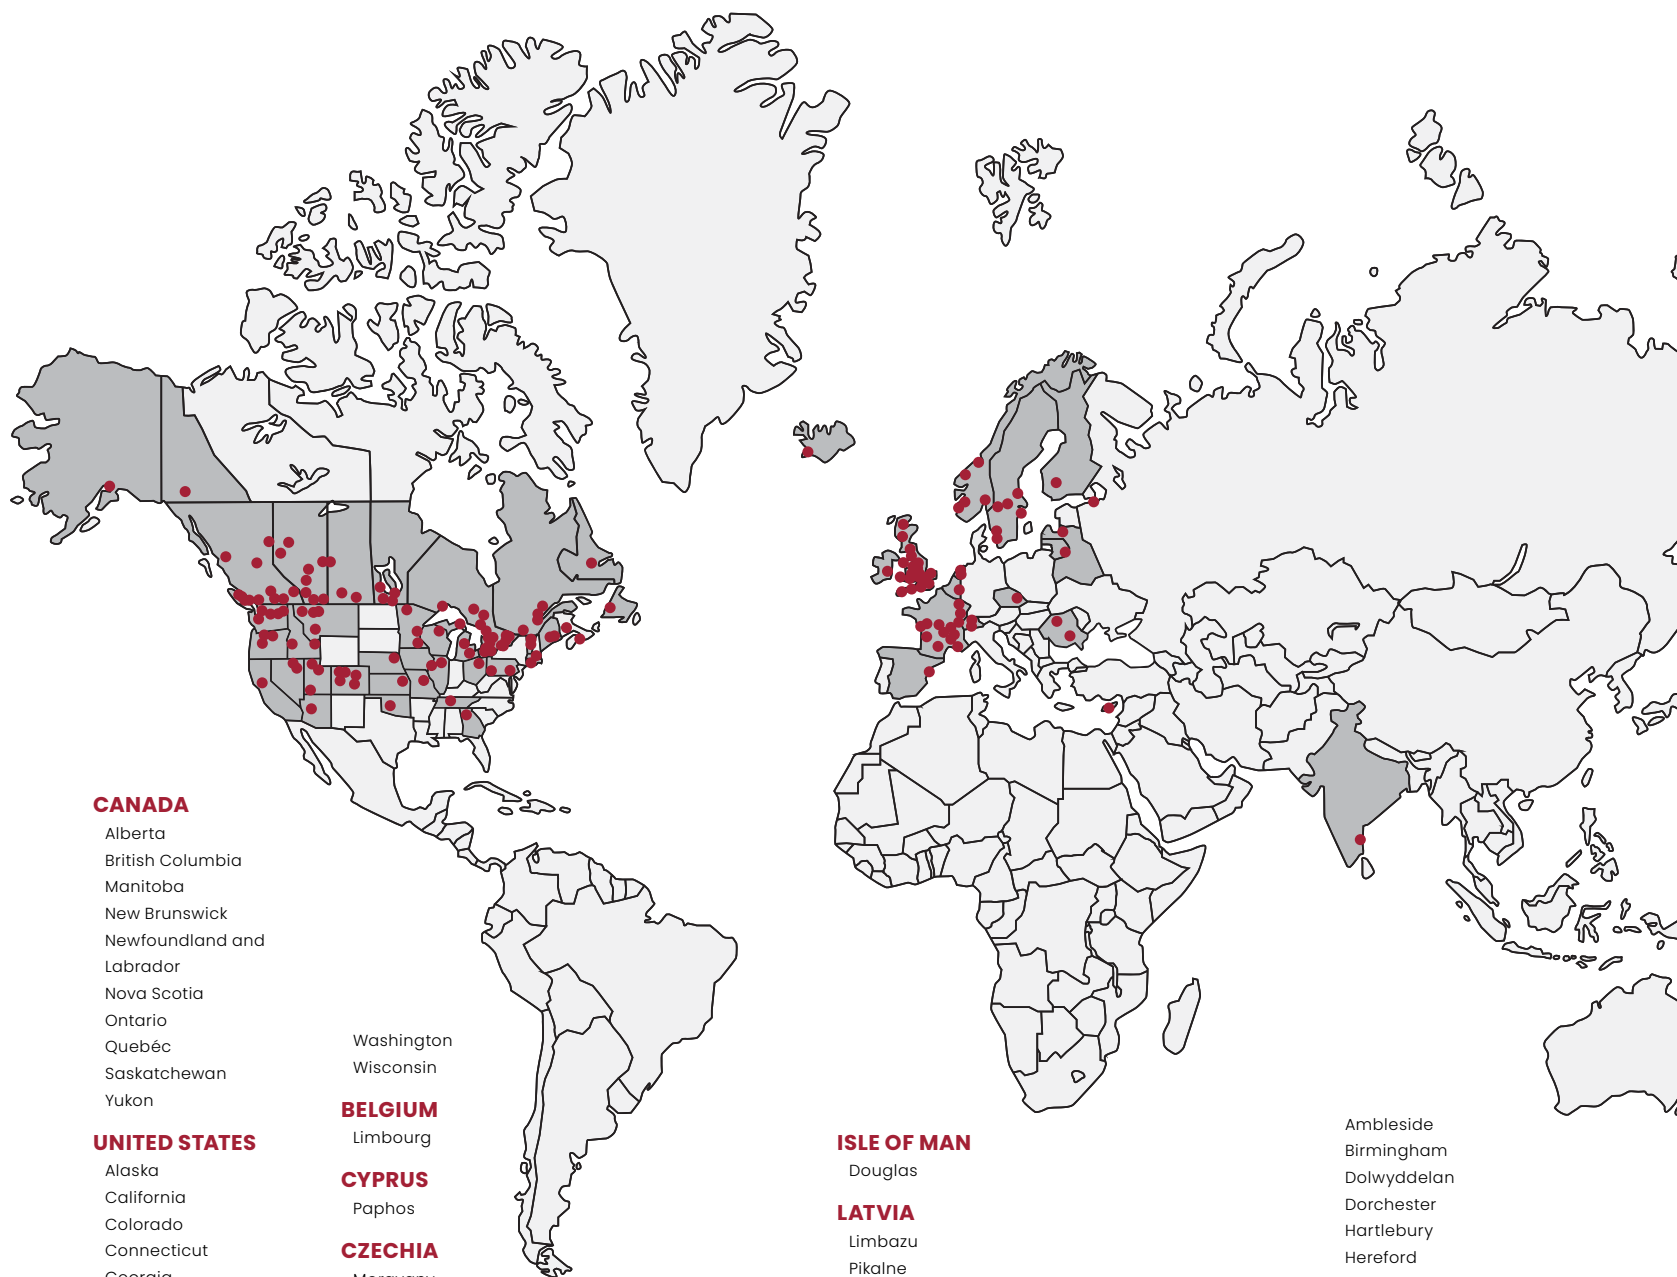

Additionally, to embody our commitment to a greener, cleaner planet, we are compliant with the rigorous requirements of the California Energy Commission.

For more information on our various safety and manufacturing certifications, please contact us.

Arctic Spas® Custom Series vs. Other Spas

Searching for your dream hot tub? Use this comprehensive buyer's guide as a resource to help find your ideal spa.

			
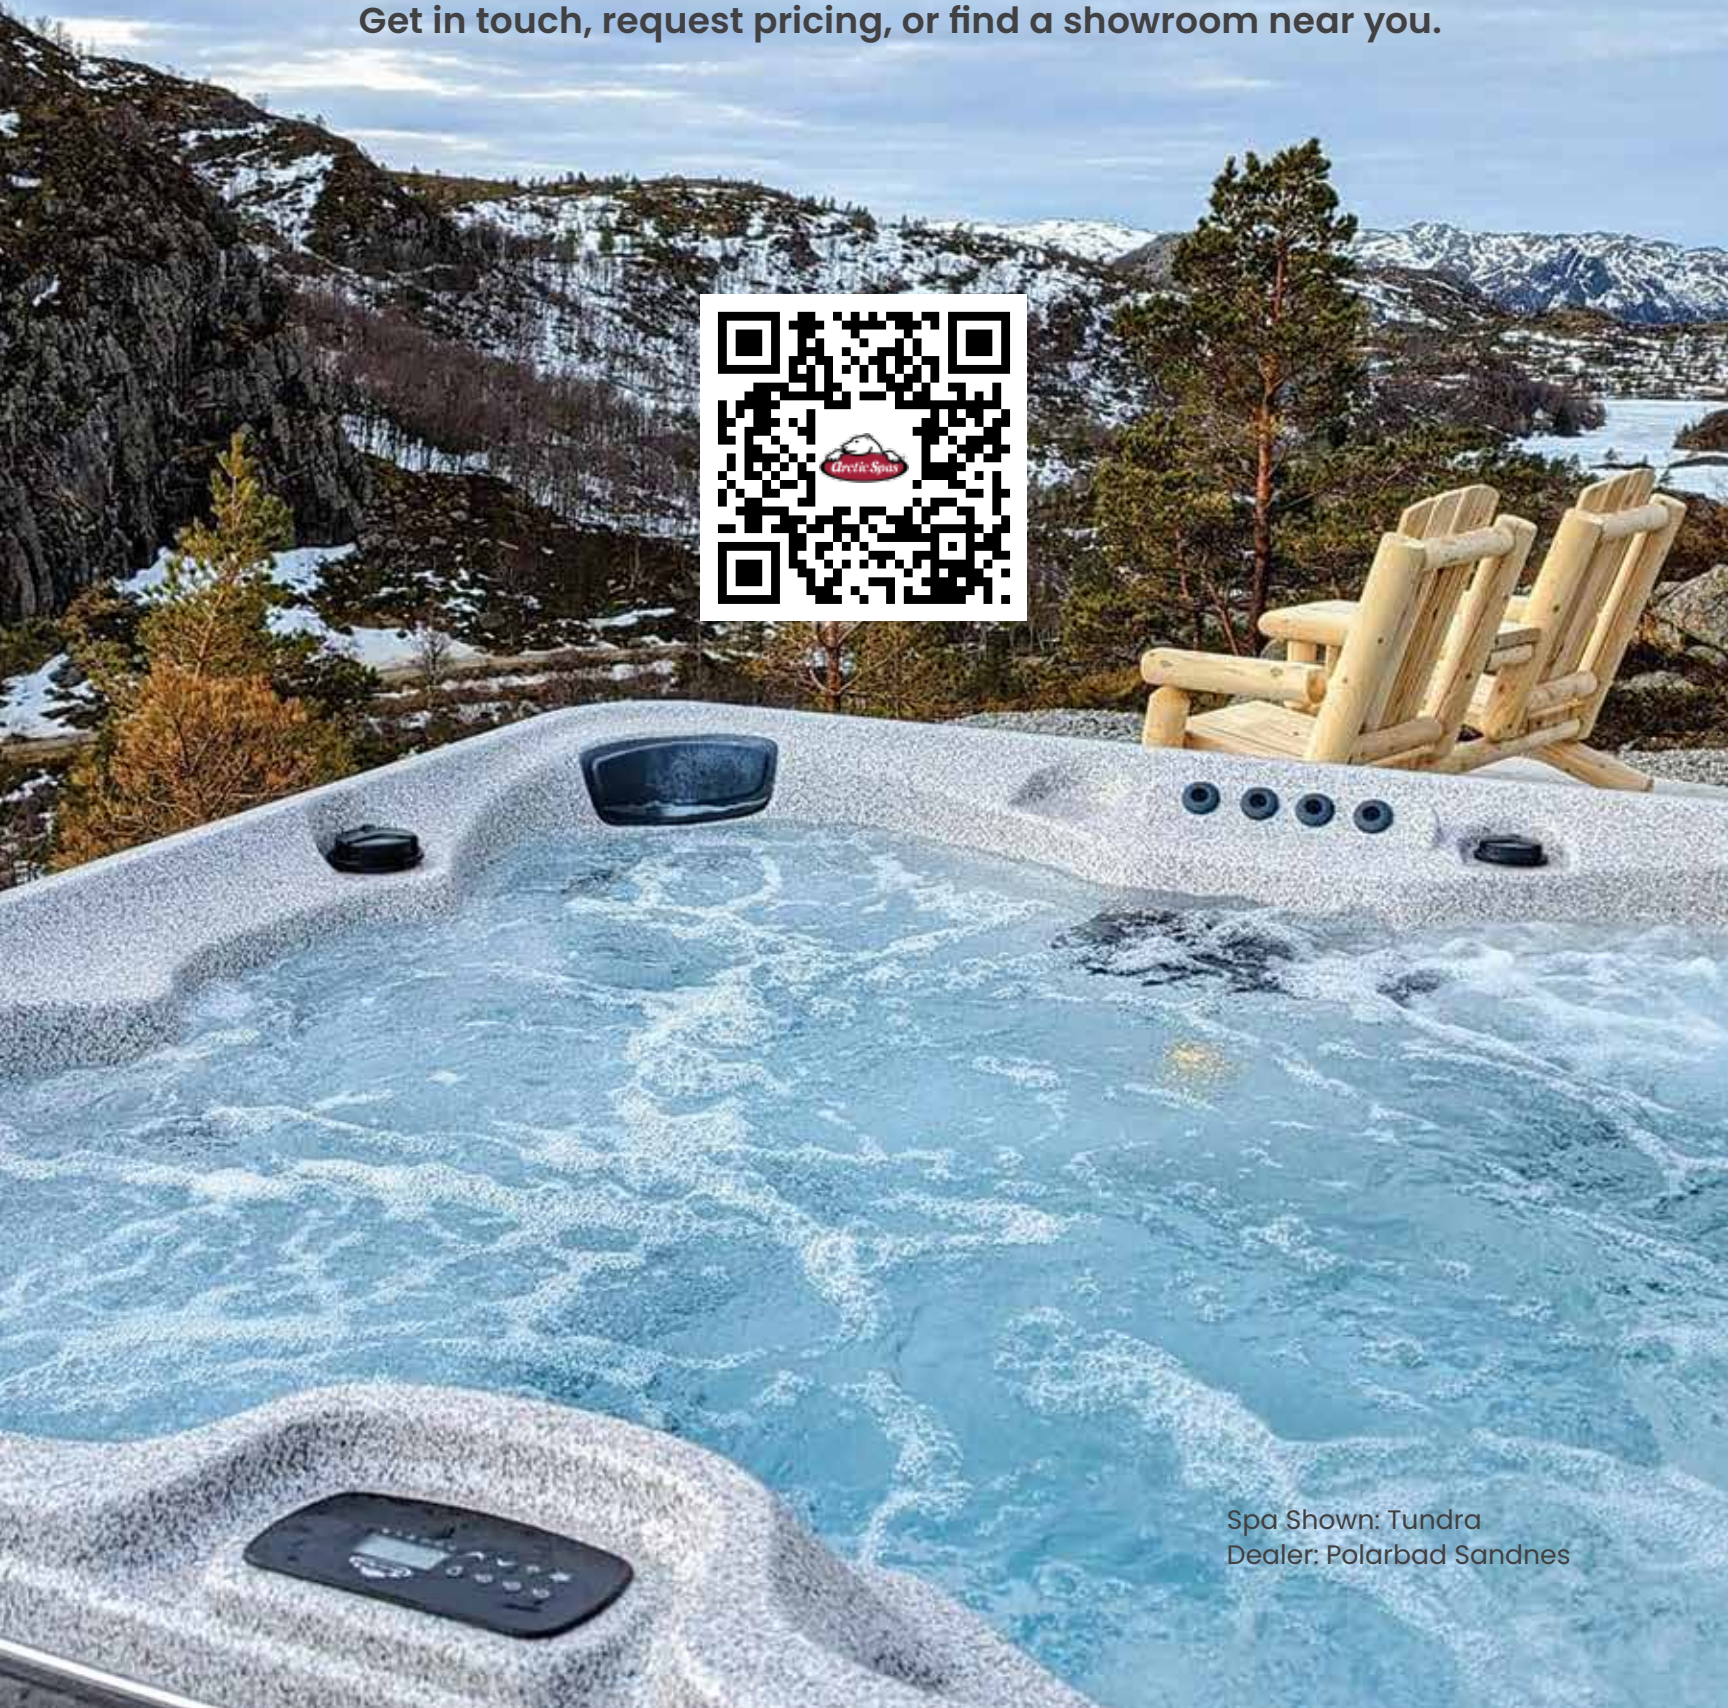

Self-Supporting Shell: Can this hot tub support the weight of water, occupants, and equipment without reinforcement from intrusive foam?	✓		
FreeHeat™: Can this hot tub recycle excess internal heat to warm its water? Can this spa's water stay hot without heater use, helping to lower energy costs?	✓		
Total Access™: Does this hot tub have removable panel doors to make upgrades, repairs, and maintenance simple and cost-effective?	✓		
Forever Floor™: Does this hot tub require an extensive site set up? Is this hot tub's flooring completely sealed and insulated? Does this hot tub have a lifetime floor warranty with or without a concrete pad**?	✓		
Mylovac™ Cover: Can this hot tub's cover support up to 1000 pounds per side? Is this spa's cover reinforced with metal channels and double-density foam?	✓		
Reflex Torsion Hose: Is this hot tub's plumbing sturdy enough to be self-supported while also preventing water flow restriction? Does this spa have color-coded piping for easy identification?	✓		
Power Management: Can this spa's heater be turned off during peak times? Can you set specific times for your spa to operate?	✓		
Peak Ozone: Does this spa offer ozone oxidation for sanitization? Does this hot tub's system have mixing chambers to increase contact time with ozone?	✓		
SpaBoy® Water Monitoring System: Can this spa's system monitor and automatically adjust its water conditions with minimal user intervention? Does this spa send you mobile water-balancing alerts?	✓		
Customization: Can you completely customize jet, lighting, and sound packages?	✓		
Warranty: Does this spa's shell structure have a lifetime warranty***? Does this hot tub have a 5 year parts warranty? Does it have a 5 year labor warranty?	✓		
OnSpa® Home Connect App: Can you monitor this hot tub from anywhere in the world? Can your dealer access your spa for support questions and automatic upgrades? Can you manage your watercare system remotely?	✓		

*Lifetime floor warranty is exclusive to Forever Floor™. All-Weather Pools require the addition of a concrete pad.

**Lifetime shell warranty is exclusive to the shell's structure, not its surface.
